

Product data sheet

Mineral: Maxcare Natureblend Beef

Product code: 11416725

Soil Association approved mineral supplement formulated to help balance forage-based organic beef rations throughout the year.

Ideal for

- Growing beef cattle in organic farming systems throughout the year.

Features and benefits

- **Soil Association approved** mineral supplement for growing beef cattle in organic farming systems.
- Includes **seaweed meal** as a natural permitted source of essential trace elements.
- **Sulphate free**; inclusion of IntelliBond as a replacement for sulphate ensures that rumen function and nutrient is optimised for milk production in breeding cattle, as well as volatile fatty acid production and subsequent liveweight gains in growing cattle.
- **Improved palatability**; animals prefer supplements that contain IntelliBond trace minerals over supplements with sulphate, oxide and organic trace minerals.
- **IntelliBond trace minerals**; independent university research has shown IBC and IBZ to have 1.96 and 2.04 times greater relative bioavailability (RBV) when compared to inorganic sources of copper and zinc respectively. Meaning we can feed less for the same effect.

Directions for use

- Place in a free-draining trough where animals gather regularly, or mix into or sprinkle onto feeds to provide the recommended feeding rate.
- Contains copper, do not feed to sheep.

Recommended feeding rate

- Beef cattle 100-150g/head/day.

Pack weight

25kg

Product specification

Nutrient	Value
Calcium %	Bal*
Phosphorus %	2
Magnesium %	4
Sodium %	10
Selenium mg/kg	25
Cobalt mg/kg	20
Iodine mg/kg	200
Manganese Oxide mg/kg	1200
IntelliBond Zinc mg/kg	2500
IntelliBond Copper mg/kg	1000

*Formulation balanced on limestone.
