

Maxcare pig and poultry product guide

Precision-formulated feed and mineral supplements

Maxcare pig and poultry mineral range

The Maxcare® pig and poultry mineral range has been formulated to meet the requirements of all the stages of pig and poultry production and provides high quality, well-balanced nutritional solutions.

All of these minerals contain Selko® IntelliBond® sources of zinc and copper to ensure increased bioavailability and optimal performance.

Maxcare Piglet

Suitable for inclusion in piglet feeds up to 8 weeks post weaning to provide a high level of vitamins and trace elements to the piglet at this critical stage in its life. IntelliBond copper is included, which has been shown in trials to give equivalent performance to the previously allowed higher levels of copper. Contains phytase to enhance phosphorus digestibility and performance.

Maxcare Fattening Pig

Suitable for feeding to pigs from 12 weeks of age until slaughter. Provides the full complement of vitamins and trace elements to ensure optimal growth and performance. Contains phytase to enhance phosphorus digestibility and performance.

Maxcare Sow

Suitable for dry and lactating sows and provides the full complement of vitamins including folic acid and biotin. This, combined with optimal levels of trace elements, will help to ensure optimal reproductive performance and efficiency. Contains phytase to enhance phosphorus digestibility and performance.

Maxcare All Purpose Pig

Suitable for use in all pig feeds, providing the complete range of vitamins including folic acid and biotin together with optimal levels of trace elements. Contains phytase to enhance phosphorus digestibility and performance.

Maxcare Amino Pack 1

A blend of lysine, methionine and threonine to enable easy and convenient addition of these key ingredients to any pig feed.

Maxcare Layer Rearing

Suitable for all phases of rearing layer pullets up to **16/17 weeks**, supporting the development of a robust, well grown out pullet to ensure a successful laying period. Provides a full complement of vitamins, trace minerals and antioxidants to support animal health and development at this critical stage in its life. Contains a phytase and NSP enzyme to enhance digestibility and feed utilisation. Available with or without amino acids.

Maxcare Layer

Suitable for feeding in all laying feed formulations. Provides the full complement of vitamins and trace elements to ensure the requirements of high egg production can be satisfied, helping to optimise performance. Contains natural yellow and citranaxanthin yolk pigments, with an expected yolk score of 12. Contains a phytase and NSP enzyme to enhance digestibility and feed utilisation.

Maxcare Broiler Starter

Suitable to feed to chicks up to **3 weeks**, providing essential nutrients in the correct ratio to promote development while supporting rapid growth rate. Does not contain a coccidiostat. Contains a phytase and NSP enzyme to enhance digestibility and feed utilisation.

Maxcare Broiler Grower / Finisher

Suitable for feeding to broilers from **3 weeks** of age until slaughter. Provides the full complement of vitamins and trace elements to ensure optimal growth and performance. Does not contain a coccidiostat. Contains a phytase and NSP enzyme to enhance digestibility and feed utilisation.
