Dear Amanda Stringer

RE: Feed Hygiene Approval Number

The FSA have very recently written to all Local Authorities involved in the Approval and Registration of Feed Businesses. They have expressed concern that the issue of approval numbers and their format are not currently in line with the legislation and the Feed Law Code of Practice. There also exists some discrepancy between both the Code and the legislation currently in force, which will be addressed later. As a result, some issues have been raised on import/export documentation to the EU.

The FSA have now asked all authorities to review the approval numbers issued, amend as appropriate, and inform all approved premises within their authority. The affected businesses must then alter the approval numbers used on all labels and documentation before June 2023. The FSA are aware that due the nature of some products they may still be on the market after this date with an incorrect label. Because of this, please find below the new approval number issued to your business, and could you please confirm that you will be amending labels and documentation before June 2023?

Your new approval number is αGB061002

If you have any questions, then please do not hesitate to contact me.

Yours sincerely

Andrew Brew
